RE: CPF 2-2007-1002W
Warning Letter

Dear Ms. Daugherty:

Florida Gas Transmission, LLC (FGT) received a Warning letter from your office dated January 11, 2007 on January 16, 2007. The letter alleges that Florida Gas Transmission, LLC committed a probable violation of the Pipeline Safety Regulations Title 49, Code of Federal Regulations, specifically §192.605 Procedural Manual for operations, maintenance, and emergencies, subsection (a) General. The infraction specified was that one FGT team did not follow the instructions detailed on an electronic form about filling in certain information in the "Comments section" of the regulator inspection electronic form, which is part of the electronic record keeping system.

FGT agrees that the MP2 electronic form does contain instructions for the operating personnel to include information in the Comments Section of the Work Order to detail information on **set point, as found, as left and lock up confirmation**. Florida Gas Transmission, LLC feels that this is an isolated incident and the Area Director responsible for supervising this team has counseled the operating personnel about the importance and critical nature of the information. I have informed other Area Management personnel about the problem, so that they may emphasize to their teams, that they should show the same diligence in following the instructions on these forms as they already do in following our operating procedures.

Sincerely,

RECEIVED FEB 6 6 2007

Rick Craig
Vice President of Southwest Division
Florida Gas Transmission, LLC
